### 3C.52

It is important that the sewer system is protected against acidic effluents and the charge for pH is therefore punitive. Similarly, metals are detrimental to the environment and the metal charge is also punitive. In addition, the discharge of excessive quantities of fat, oil and grease (FOG) into the sewer system causes blockages which is a public nuisance, a health risk and impedes the proper operation of the City's Waste Water Treatment Works. Hence the FOG charge is also punitive. Therefore, in cases where the Water Services By-laws are violated, pH will be assessed on the lowest and metals and FOG on peak values recorded during a six monthly period, irrespective of whether the industrial effluent volume discharged during that period is less than the value stipulated in clause 4.2 below.

- 6.2. In the case of any trade or industry in respect of which the average monthly volume of trade or industrial effluent generated during the previous half-year period was less than 100 kilolitres, the charge shall be R43.08 per kilolitre except where punitive charges are applied.
- 6.3. In respect of domestic effluent discharged from the premises of any trade or industry for which a charge was levied in terms of clause C (1) above, the charge shall be R43.08 per kilolitre.

In the absence of direct measurement, the domestic effluent will be estimated as follows:

- (a) 1,0 kilolitre per full-time staff member per month.
  - (b) 4,0 kilolitre per resident per month {not included in (i) above}.
  - (c) For staff canteens: 0,15 kl per meal served per month.
  - (d) The working month will be based on a 5-day working week. In cases where the working week deviates from 5 days, a pro rata adjustment will be made).
- 
- 6.4. Where the average monthly volume of trade or industrial effluent generated during the previous half-year period was more than 50 kilolitres, rebates under A above to be granted under conditions specified by the Council as follows—
    - (a) 10% if discharge occurs at specified times only;
    - (b) 15% if flow is balanced and discharged evenly over seven days at specified times only;
    - (c) 20% if effluent contains readily bio-degradable carbon beneficial to the Council's treatment processes; and
    - (d) 50% maximum if (c) occurs with (a) and (b).
  - 6.5. For the disposal of organic industrial wastes delivered by tanker to the wastewater treatment works: R25.31 per kilogram of COD.

### EMBEDDED GENERATOR MINIMUM CONDITIONS

- In terms of the provision of the Electricity Regulation Act, (Act 4 of 2006) (ERA) generation of electricity is a licensed activity, unless exempted by the Minister of Energy. The approved tariffs are therefore subjected to the provisions of the ERA, and are otherwise interim/pilot.
- This tariff will only apply to customers that are net consumers at City Power and who have invested in embedded generation capacity, are grid-tied (and comply with all the regulations regarding grid connection).
- That the embedded generator is required to register with City Power and the equipment used must comply with the technical standards required by City Power.
- All Large Power Users and Business customers who would be willing to invest in embedded generation with the purpose of supplementing their electricity supply from City Power will have to be on a conventional tariff structure. If they are currently on a prepaid structure, they will be required to migrate to a conventional tariff structure.
- All residential customers who would be willing to invest in embedded generation with the purpose of supplementing their electricity supply from City Power, will have to be on a time-of-use conventional tariff structure. If they are currently on a prepaid structure, they will be required to migrate to the time-of-use conventional tariff structure.
- Embedded generators that are at any time capable of feeding energy back into the grid will require meters with bidirectional metering capability.
- All parties that would invest in generating electricity capacity and who would elect to only feed into the grid (and never draw from the grid) will be treated as an additional supplier under a negotiated power purchase agreement.
- Embedded generation tariff is only applicable to maximum generation capacity of 1MW
